CHSE Linkedin Testimonials

Elizabeth V., Manager of Medical Records/Security Privacy Officer at Maryellen Romano MD
Greater New York City Area

As someone who works in the medical field obtaining my HIPAA training certification was very important to me. The training offered was cost effective, fast and convenient. I was amazed at how easily I was able to retain the information presented to me. This really prepares you for what you will be seeing everyday in the medical field and I'm glad I was trained to know how to tackle each situation as it comes to me. I would highly recommend this to anyone in the medical field.

I highly recommend the Supremus Group for all your HIPAA training needs. They have a well planned out structure to their courses and it was easy to follow. Bob Mehta is also a pleasure to deal with. Bob and his team were very responsive to all my emails and provided excellent customer service when needed.

If you work with healthcare customers in the IT field, then you need to attend CHSE training. There are a number of regulations that—from a consultant or solution design perspective—you can help your customers to understand. From putting disaster recovery solutions in place that are compliant with the HIPAA guidelines to entering into Business Associate Agreements—the HIPAA training is all geared towards helping your clients mitigate their risk, increasing their revenue streams and ensuring they are compliant with all aspects of the HIPAA security rule. The training is specific, detailed, organized and well worth the time. There’s more information for you to review than you would have thought and at the end of the day the CHSE training will undoubtedly better prepare you to serve your healthcare customers.

Michael S., Systems Administrator at Juliette Fowler Homes, Inc.  
Dallas/Fort Worth Area

HIPAA and HITECH regulations are an ever growing presence within health care IT. The problem that I had and I guess many others face is getting caught up. HIPAA started in 1996 and appears to be snowballing with new regulations. Being new to the health care side of IT, I was overwhelmed. Attending the CHSE course provided me with the tools and knowledge to get caught up with rulings and I learned how to stay ahead of this ever maturing administrative process. I would highly recommend attending.

Being a consultant in the HealthIT field, it is imperative that I know and understand HIPAA compliance and rules. HIPAA can be overwhelming at first and hard to understand. Taking the course through HIPAA Training made it easy and efficient for me to understand. I would highly recommend taking their courses as a way to learn on your own time and fully grasp the requirements set forth for this industry.

Erin S., CEO at EFS Medical Consulting
Redding, California Area

I enthusiastically recommend Bob Mehta and his Supremus Group for any or all HIPAA-related training. Their CHSE training is presented in easily understood units, narrated by a well-informed teacher, using excellent graphics, reference materials and linkages to more learning resources. There are comprehension tests at the end of each unit, and a Certification Practice Test at the end. You can re-take any unit and unit test as many times as you need and Bob is just a quick keystroke away.

Certified HIPAA Security Expert (CHSE)

Product Overview

This HIPAA Security course will help you to understand the HIPAA regulation requirement for Security rule & denial, overview on HIPAA privacy rule and guide you on how to help your organization achieve HIPAA compliance. Our training is updated in accordance with the HIPAA regulation because of the Health Information Technology for Economic and Clinical Health (HITECH) Act which forms a part of the American Recovery and Reinvestment Act of 2009 or ARRA and Omnibus rule of 2013. Otherwise, the training equips a student for the HIPAA certification and for Certification (CHSE).

Kevin A., Founder at Defense Manufacturing & Supply LLC

Washington D.C. Metro Area

As an IT consultant in the Health Care Industry concentrating specifically on COTS software on HIPAA HIT/HITECH-related requirements, my firm strongly recommends that healthcare organizations certified and follow with a CHSE certification. Our team performed an extensive due diligence on HIPAA training modules and certification sites and the selection of HIPAA Training net. http://www.hipaatraining.net was a unanimous choice. The web portal for the course was quite easy to navigate and the instructions for each section were clearly in line with the particular area of expertise. Clearly I strongly recommend these course offerings and to a veteran of various on-line courses this is by far the most professional and comprehensive course I have taken.
